

Moisture meter DM4A

digital display -

Universal measuring device for the determination of moisture in paper, cardboard, wood, building materials, insulating materials and other materials, also suitable for moisture measurements in mobile homes and caravans or on GRP boats (osmosis problems).

Technical data:

- Measuring range: 0 - 100 % (adjustable)
- Resolution: 0.1 %
- Measuring depth: approx. 3 cm
- Measuring frequency: 1 - 10 measurements/s (adjustable)
- Attenuation: 0 - 99 % (adjustable)
- Measured value memory: 100 measured values
- Dimensions: approx. 200x80x40 mm
- Weight: approx. 250 g

Options:

- with aluminum housing base, thus higher stability for mechanical or electrostatic loads
- RS 232 interface cable
- USB - RS 232 adapter
- PC software, DMI controller
- Test module PE30
- Test module PE05
- Lithium battery > 30 hours measuring time
